## At your service for 30 years

Jankó Ltd. has more than 30 years of experience in the high quality outdoor wood doors and windows market. As a family enterprise, we perfectly understand that a house is more than a building. It is also a home and therefore we aim to satisfy customer demand and provide better, attractive and most innovative solutions to creating a home.

“WE GUIDE OUR CLIENTS THROUGH THE ENTIRE PROCESS OF SELECTING AND INSTALLING DOORS AND WINDOWS, TO ENSURE THAT WE CAN JOINTLY FIND THE MOST APPROPRIATE SOLUTION.”

**As a Hungarian enterprise, we highlight the use of quality materials made in Hungary, contributing to the satisfaction of our clients, as well as the development of the domestic industry as well.** We steadfastly believe that you will be able to find the doors and windows of your dreams from our own-manufactured, domestic products.

## 6 ADVANTAGES OFFERED BY JANKÓ WINDOW!

### **01 High level of expertise, 30 years on the market**

We have a market experience spanning several decades. We have worked for 30 years to ensure that the best and most innovative doors and windows are manufactured for you.

### **02 Cutting-edge technology, custom solutions**

Our innovative, modern technological solutions and our customised, tailored products guarantee that everyone finds the doors and windows perfect for their homes.

### **03 Simple solutions, all from one vendor**

We follow through customer demands from the design phase to installation. We assist your decisions with designs, plans and node drawings, to make sure that ideas become reality.

### **04 Excellent materials, high level of expertise**

We use carefully selected materials, and with the high level of expertise of our staff we provide you with the best products possible.

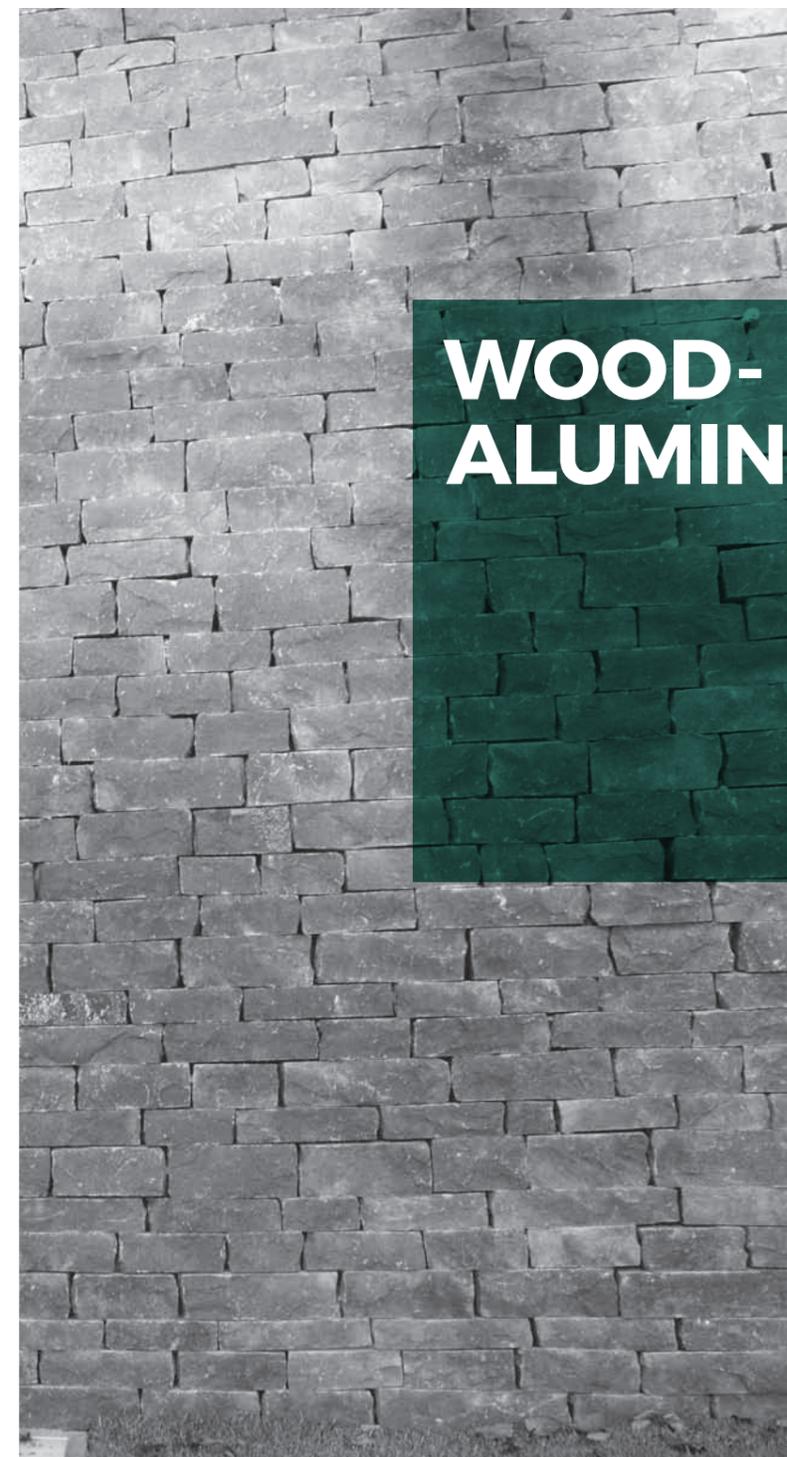

### **05 Meeting deadlines accurately**

We operate with a short lead time and a high level of precision to manufacture our products, also covering meeting the delivery deadlines at all times.

### **06 Innovation and a fresh approach**

With continuous development and top-quality machinery we always work to create better and more innovative products.

# POWER AND ELEGANCE IN ONE PRODUCT

**WOOD-  
ALUMINIUM**

## CROSS FLAT

The Cross Flat profiles merge the warmth of wood with the purity of aluminium. The flush-fitting aluminium cover on the outside provides a durable, weather-proof solution, while the diagonal design gives a modern and attractive look.

### Technical parameters:

Total value:  $U_w = 0.78 \text{ W/m}^2\text{K}$   
 Heat transfer, glass:  $U_g = 0.5 \text{ W/m}^2\text{K}$   
 Energy transfer:  $g = 45.6 \%$   
 Solar energy transfer:  $TE = 36.3 \text{ W/m}^2\text{K}$   
 Spacer thermal insulation:  $\Psi = 0.043 \text{ W/m}^2\text{K}$

## WOOD-ALUMINIUM WINDOWS

The WOOD-ALUMINIUM product range is known for its special harmony, merging in one product premium interior design and minimalist outdoor appearance. The quality wood material provides a true nature-like atmosphere, while the aluminium framework ensures the massive, strong hold and long life cycle.

The unique 30 mm locking plates, the extra clipping system and the knob locking points guarantee safety. In addition to the premium appearance, the impeccable joints, the EPDM seals, the unique hidden drainage sections, the insulated glazing, the perfect draught-proofing and surface treatment with robotic technology elevate the WOOD-ALUMINIUM product range up to the luxury category.

Despite its several technological advantages, its ease of use is a great experience for users.

### CHOOSE OUR WOOD-ALUMINIUM PRODUCT RANGE WHICH GUARANTEES A SUITABLE SOLUTION TO EVERY DEMAND!

A The system was developed to suit modern demands and architectural solutions, and thus on the average 8% larger glasses characterise the system compared to our previous systems, providing an exclusive character to the product line.

## CROSS

With its high level of compatibility, diagonal design and fine-tuned appearance the Cross profile is a unique addition to innovative homes.

### Technical parameters:

Total value:  $U_w = 0.78 \text{ W/m}^2\text{K}$   
 Heat transfer, glass:  $U_g = 0.5 \text{ W/m}^2\text{K}$   
 Energy transfer:  $g = 49.4 \%$   
 Solar energy transfer:  $TE = 41.8 \text{ W/m}^2\text{K}$   
 Spacer thermal insulation:  $\Psi = 0.043 \text{ W/m}^2\text{K}$

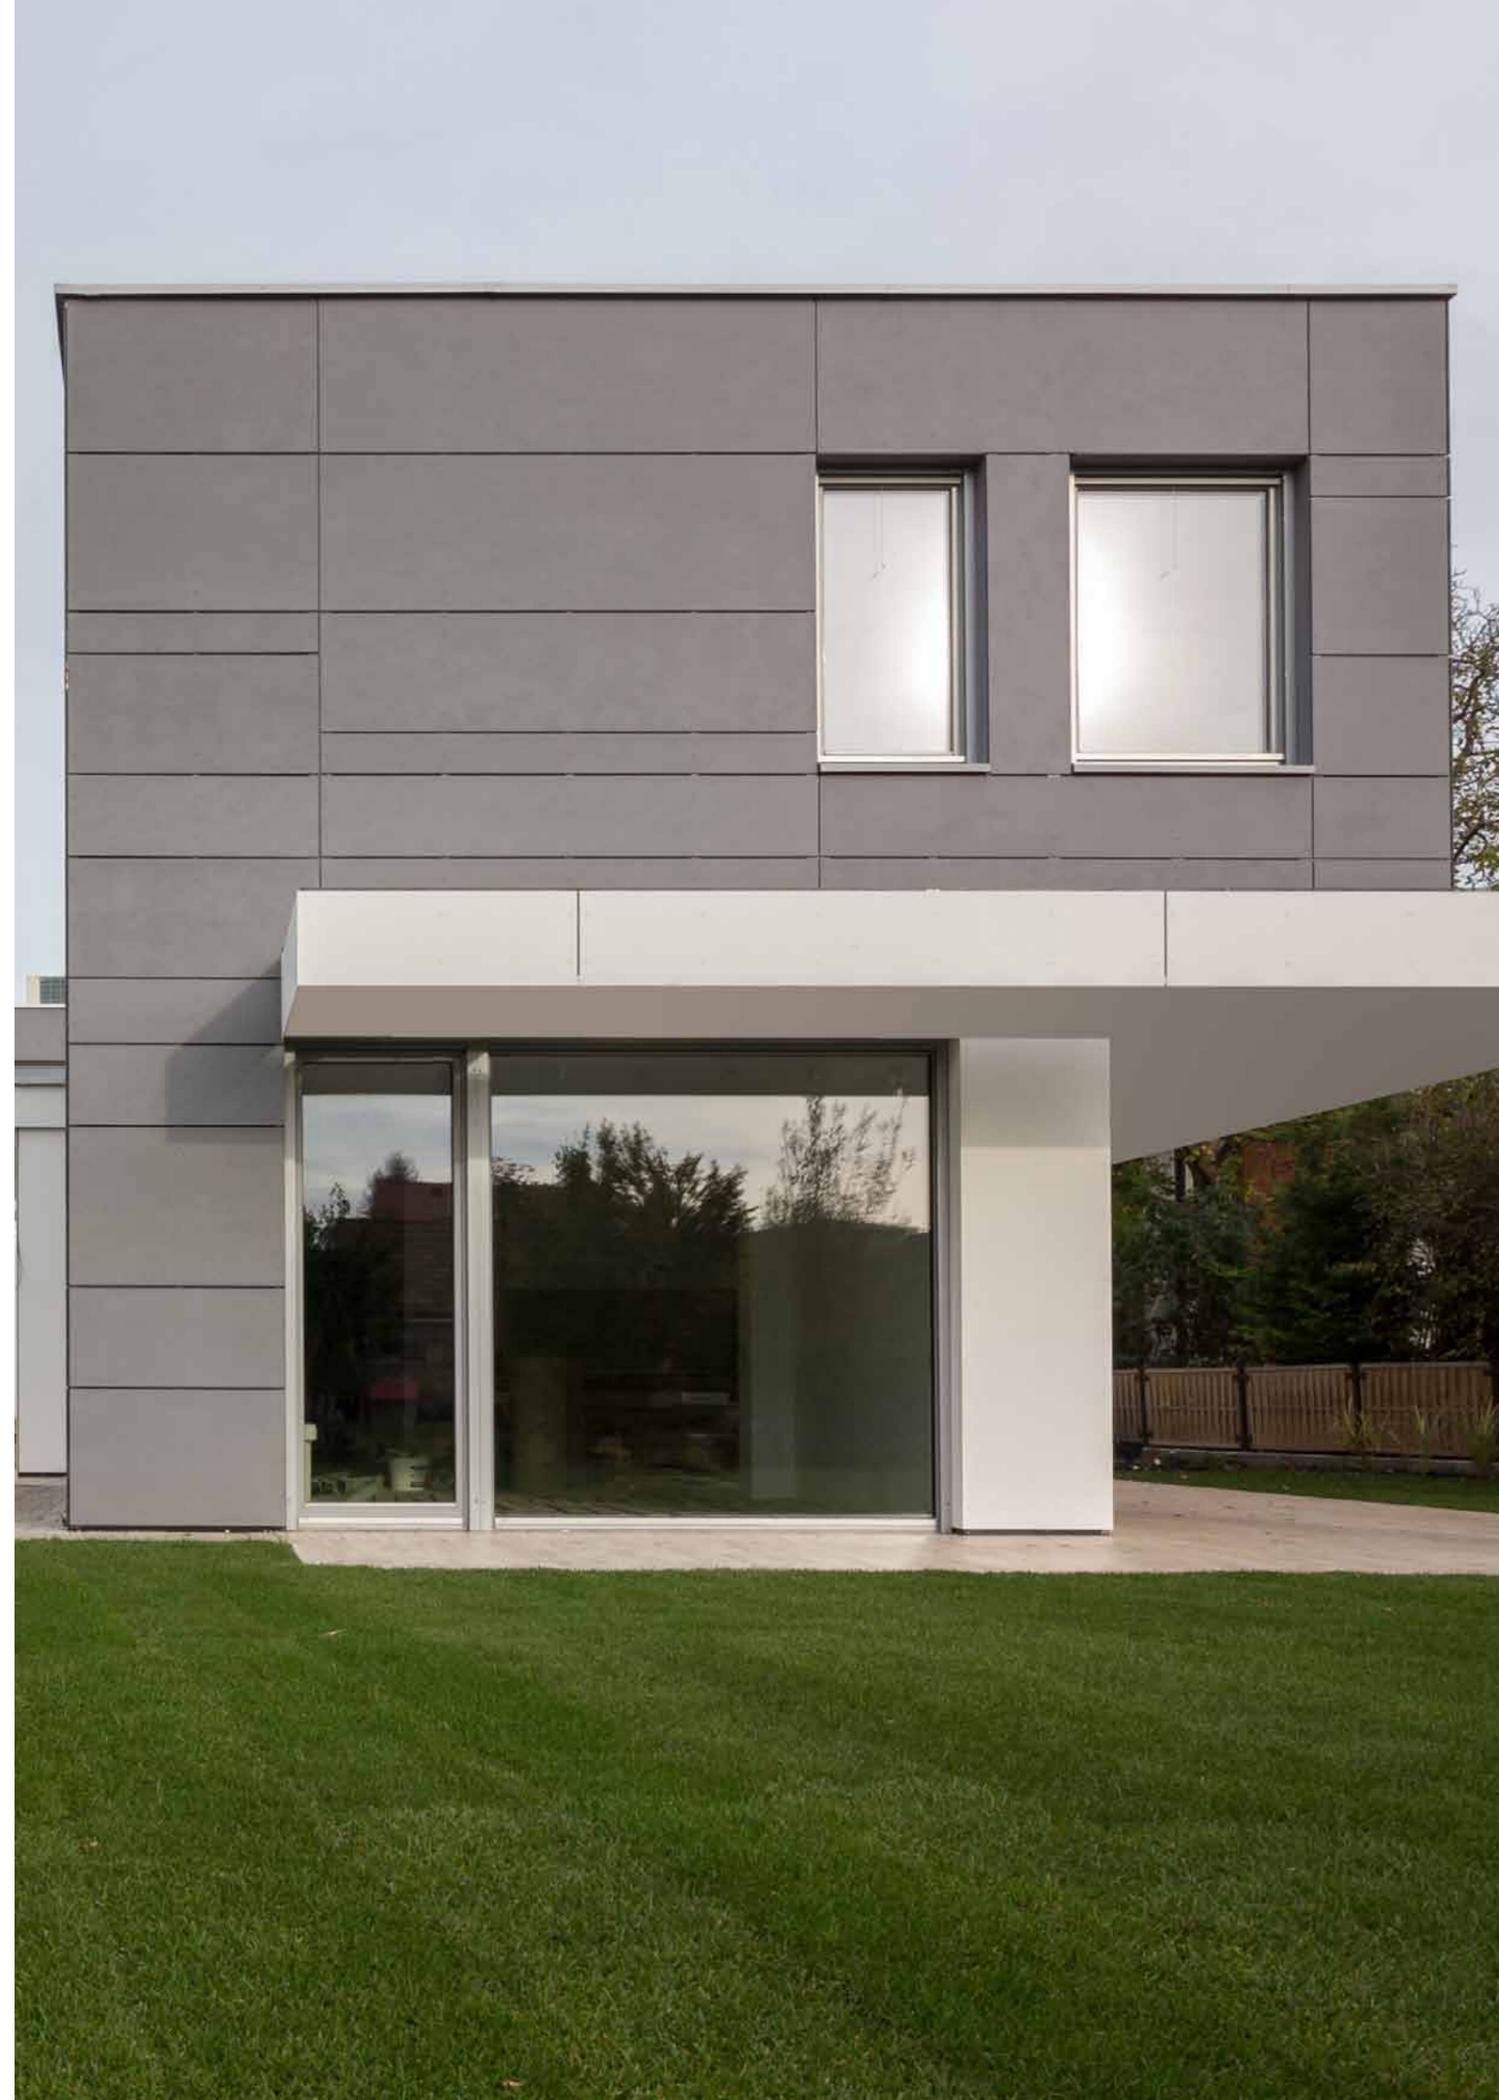

## CROSS DUO FLAT

Ageless elegance, clear design. Experience the perfect presentation of harmony between wood and aluminium, with the smooth alignment of surfaces. Let yourself be amazed by the plane, stepless design provided by the alignment of the frame and the window, both inside and outside.

### Technical parameters:

Total value:  $U_w = 0.78 \text{ W/m}^2\text{K}$   
 Heat transfer, glass:  $U_g = 0.5 \text{ W/m}^2\text{K}$   
 Energy transfer:  $g = 49.4 \%$   
 Solar energy transfer:  $TE = 41.8 \text{ W/m}^2\text{K}$   
 Spacer thermal insulation:  $\Psi = 0.043 \text{ W/m}^2\text{K}$

## ALIGNED APPEARANCE

Choose our wood-aluminium windows and doors, characterised by contemporary design, pure angular and oblique lines, clear shapes and the extreme insulation performance.

Triple-pane glass

Massive aluminium covering

Cross outside design

Cross Flat and Cross Duo Flat outside design

Cross and Cross Flat inside design

Cross Duo Flat inside design

## OPTIONAL ACCESSORIES

Make no compromise! We offer several different accessory functions to make your unique ideas come true!

### Precious wood inside covering

If you also opt for exclusive solutions, select your doors and windows with precious wood covering. Enjoy the special experience of having exclusive and attractive furniture in your window.

### Aged surface

Select the special aged surface to get a unique rustic look. Enjoy the view of windows with an antique appearance, while from the inside you experience the comfort of modern technology.

### Window louvres

Our louvres provide the optimum illumination and heat load in each period of the day. Take control of how much light you allow to enter your home!

### Duplex

Exclude unwanted environmental impacts. Make your products unique, use filmy thin outside and inside adhesive faux dividers for the window panes, contributing to a special, yet harmonious appearance.

### Opening sensor

The opening sensor enables you to control the position, opening/closing of doors and windows, thus contributing to a higher level of safety in your home.

### Austin handle

Flush handles installed in a custom milling compared to the traditional ones of windows. A thin and narrow 5 mm handle with a covering element, a truly modern and well-designed product.

### Lockable handle

Opt for a lockable handle to ensure that your home and family are as safe as possible. Especially recommended for streetside and easily accessible locations.

### Hidden fittings

The hidden design not only provides an elegant and modern appearance, it also offers functionality. If you find it important that the elegant lines of the window are not interrupted, choose our wood-aluminium windows with hidden fittings.

### Glass-glass turning

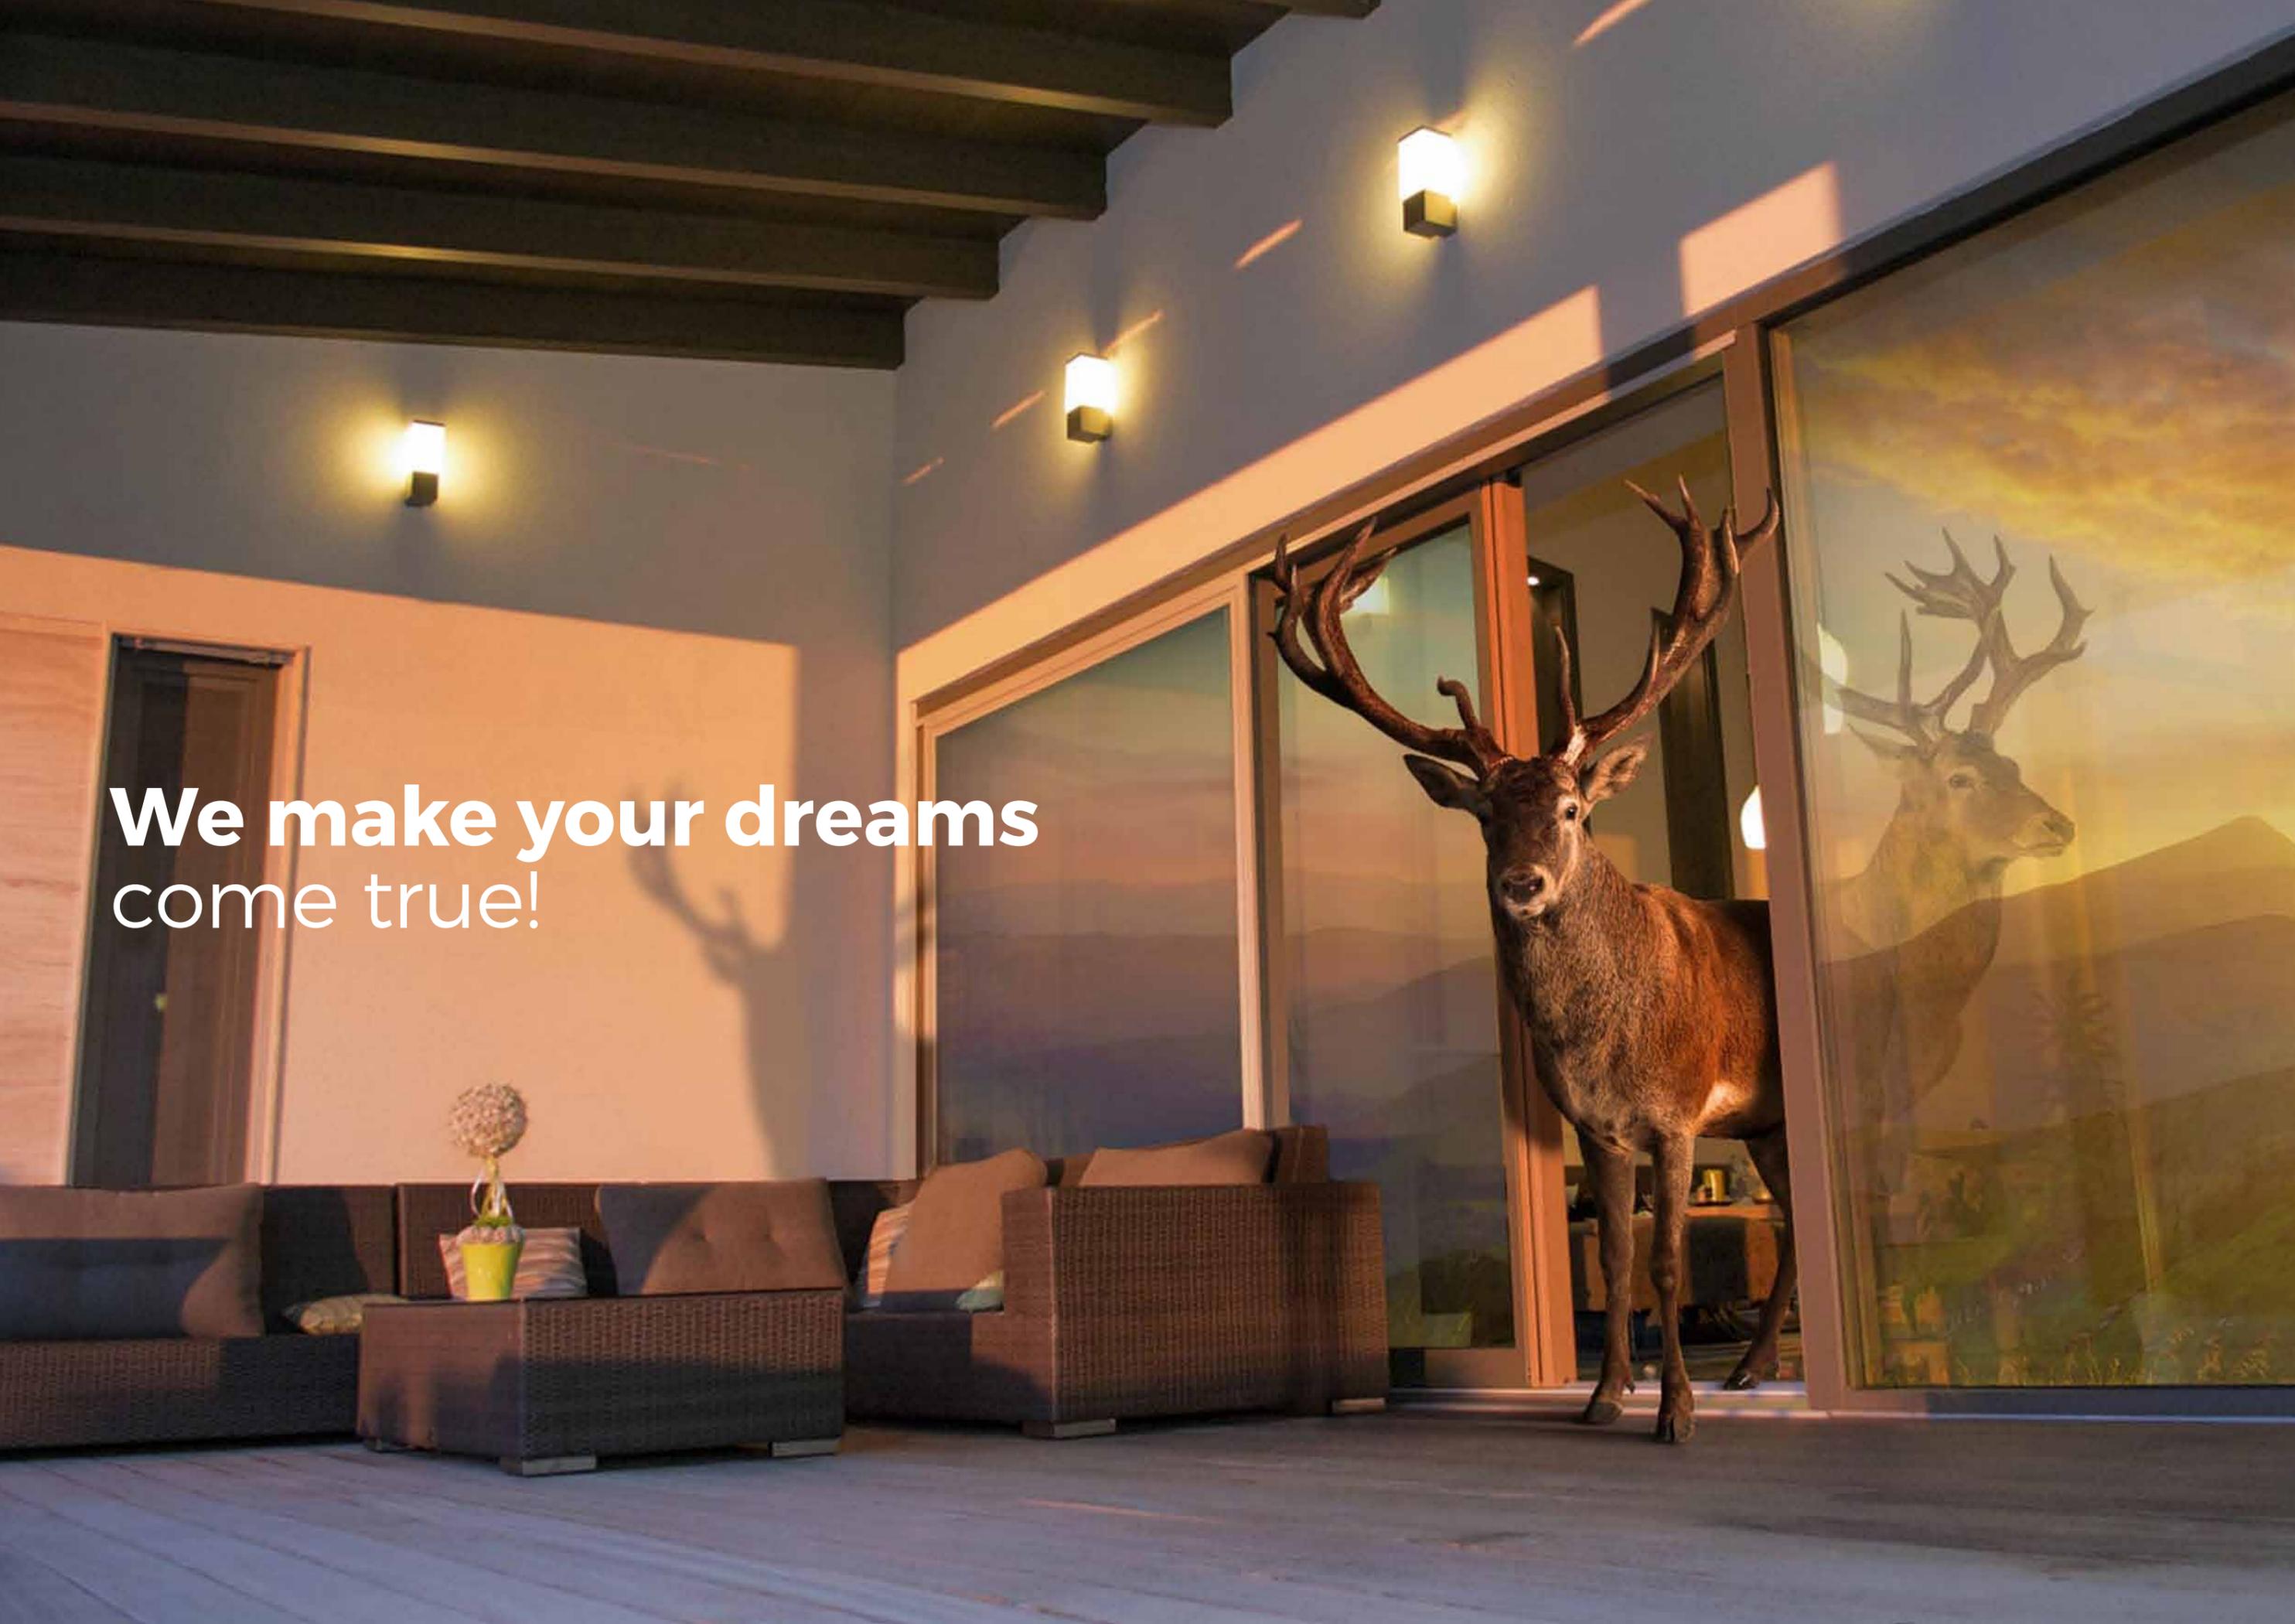

Do not let anything block your wonderful view! Our doors and windows fitted with glass-glass turning enable you to enjoy the panorama from your home even in the corners. Make no compromise!

### External and internal single-plane (flash-fitting) closure with precious wood oak

The flush-fitting design provides a modern appearance to the products. Select it with precious wood oak covering to make sure that your window also matches the style of your home.

**We make your dreams  
come true!**

## PRECIOUS WOOD

If you also love exclusive solutions, choose from our special, precious wood covered windows and doors, which are guaranteed to decorate your home.

We bring you the best of nature and we only use carefully selected materials that give your home a glorious, lasting appearance on the inside and the outside as well.

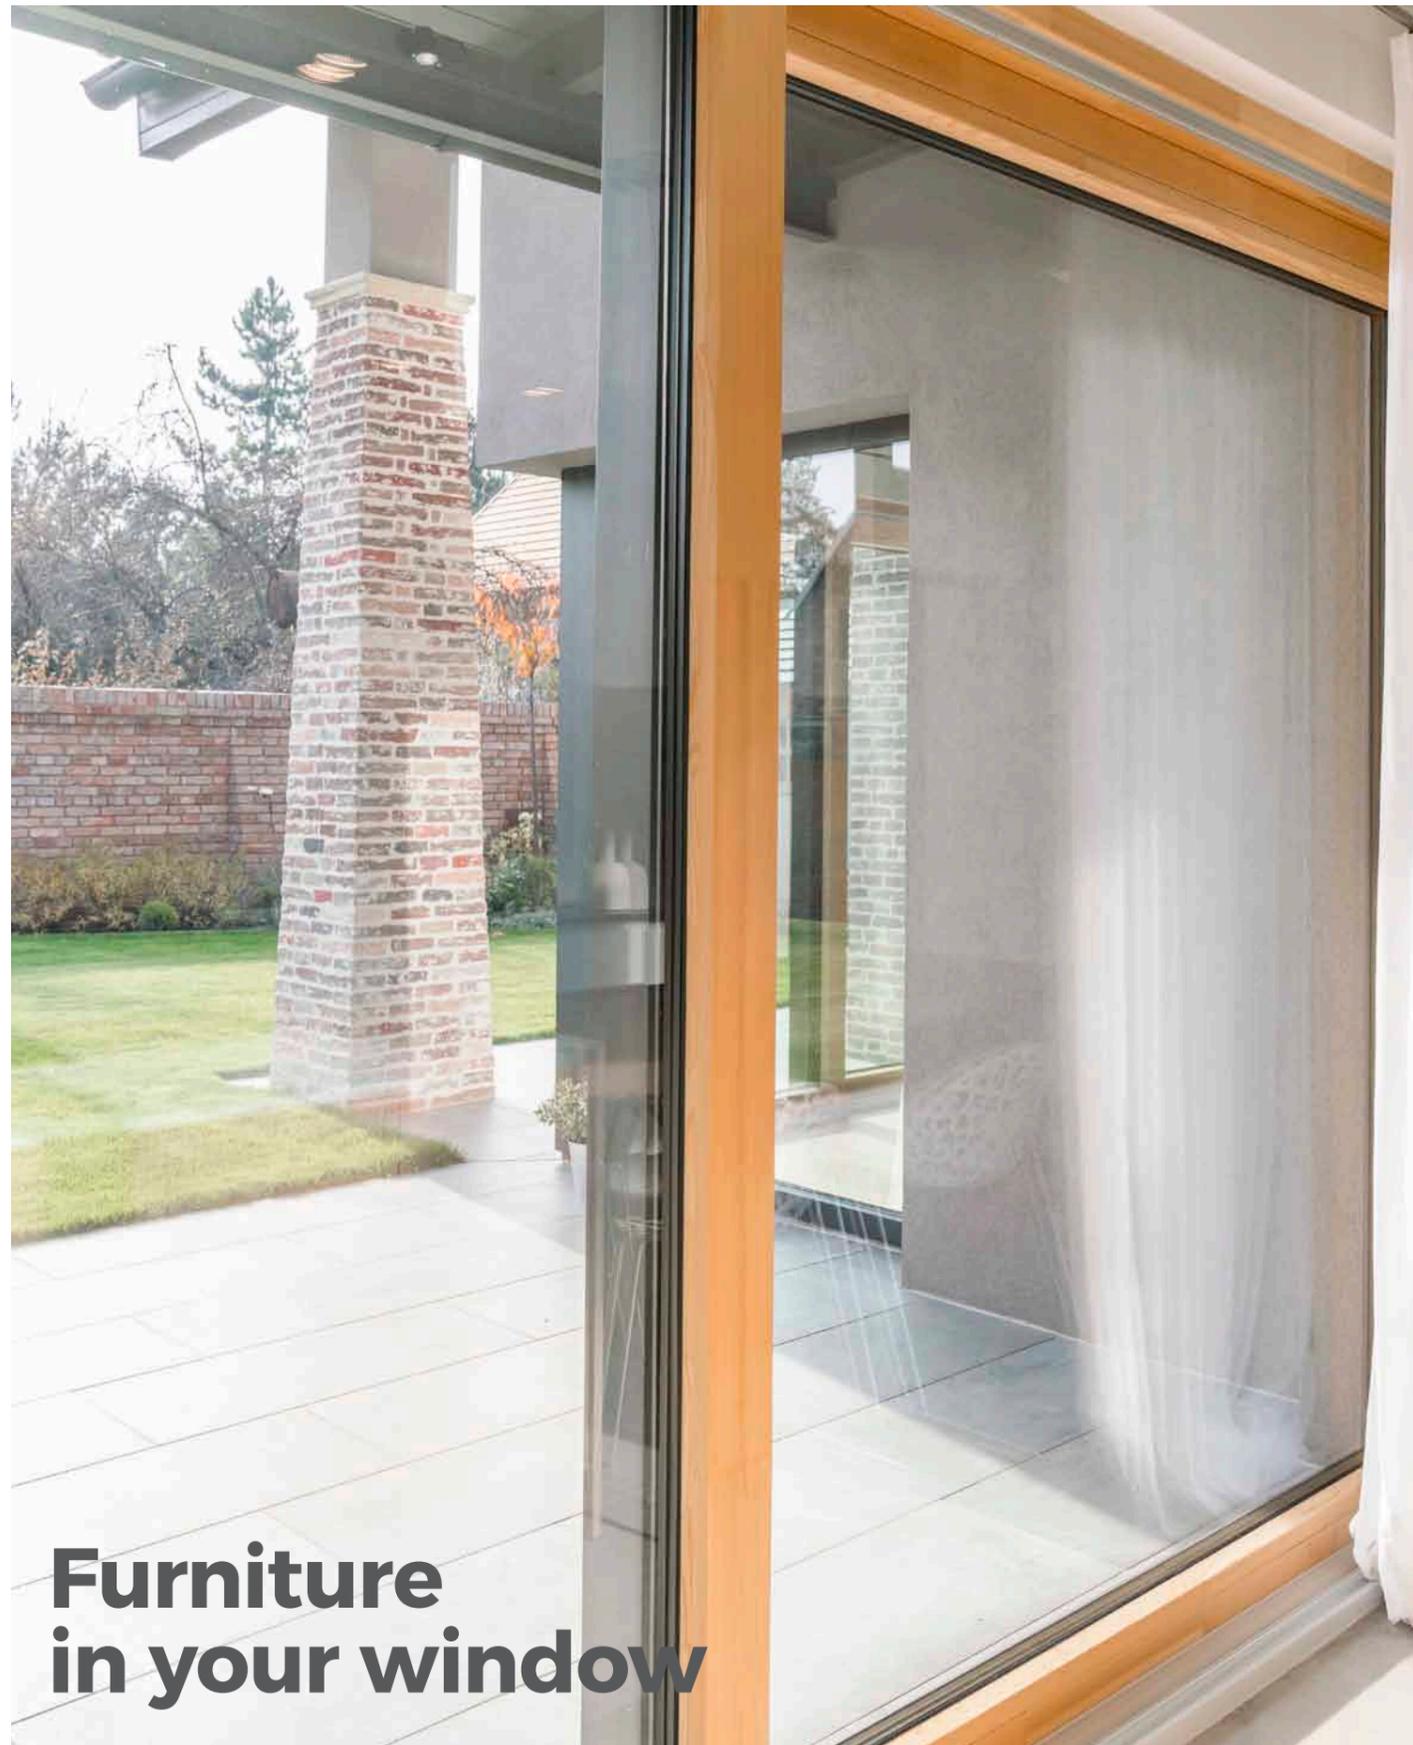

Adjust the appearance of your windows and doors to your furniture and other accessories, to make your home a tailored, sensual and natural place of experiences. Precious wood surfaces are available for any cross, flat and duo flat systems, and whichever you prefer, the natural effect is guaranteed.

**CHERRY TREE**

**EUCALYPTUS**

**Furniture  
in your window**

**SPRUCE**

**LARCH**

**OAK**

## PRECIOUS WOOD – ALDER COVERING

As a Hungarian enterprise, we are committed to the use of quality domestic materials, and in that spirit we proudly offer our special alder wood covered products, exclusively from domestic forestry sources.

By using top quality trees logged in Hungary, we do not only wish to increase your customer satisfaction, but also support the domestic industry. Alder is a precious wood with a special pattern and a yellow, russet colour, one of the most stylish component of the new type of windows.

# FROM NATURE TO REALITY

**WOOD  
BIG**

## WOOD BIG

We only use high-quality wood for manufacturing our wood windows, creating the internal harmony of the space and providing a pleasant, spectacular design in your home. This product range provides a natural experience and a weather-proof solution at the same time.

Owing to the weatherproof aluminium drainage and sill of the product line, it serves perfect comfort with a long lifespan. The maximum comfort is guaranteed by insulated glazing, impeccable draught-proofing, and quiet closing due to the foam rubber seals.

Due to the 30 mm locking plates, exceptional security and ease of use make the WOOD BIG windows even more irresistible.

## BIG 92

BIG 92 mm windows feature excellent sound and thermal insulation, elegant colour and design ranges. Modern and natural at the same time, a blend of wood and cutting-edge technology. It offers an exclusive and special solution, when you are looking to create a safe, reliable and harmonious home for your family.

### Technical parameters:

U<sub>g</sub> = 0.5 W/m<sup>2</sup>K  
 (Heat transfer factor, glass)  
 U<sub>w</sub> = 0.78 W/m<sup>2</sup>K  
 (Heat transfer factor, structure)  
 R<sub>w</sub> = 32 dB (-1;5) (Sound insulation)  
 g = 49% (total energy transfer)

## BIG 80

The BIG 80 mm window range has been equipped with unique characteristics, designed to provide a real sense of comfort to you and your family beyond its basic functions.

The high level of heat and noise protection and the triple glazing structure are the main features of the Big 80 profile, making your home and isle of peace and tranquillity.

### Technical parameters:

U<sub>g</sub> = 0.6 W/m<sup>2</sup>K  
 (Heat transfer factor, glass)  
 U<sub>w</sub> = 0.9 W/m<sup>2</sup>K  
 (Heat transfer factor, structure)  
 R<sub>w</sub> = 32 dB (-1;5) (Sound insulation)  
 g = 49% (total energy transfer)

## BIG 68

In addition to its budget price range, the BIG 68 mm wood window range is characterised by top quality, reliability and security. Exclude noises of the world from your home, let your home to be the place of complete relaxation!

Its exquisite design provides a simple, yet fantastic solution, and guarantees the perfect peace of mind after a long and exhausting day.

### Technical parameters:

U<sub>g</sub> = 1.1 W/m<sup>2</sup>K  
 (Heat transfer factor, glass)  
 U<sub>w</sub> = 1.3 W/m<sup>2</sup>K  
 (Heat transfer factor, structure) R<sub>w</sub> = 32 dB (-1;5)  
 (Sound insulation)  
 g = 63% (total energy transfer)

## IN HARMONY WITH NATURE

The flagship of our window ranges is the BIG wood window line, a blend of wood and cutting-edge technology. In addition to the elegant array of colours and designs, its top quality main characteristics make this range unique. Make your dreams come true! Create a safe, reliable and harmonious home for your family.

### Triple-pane glass

Triple glazing guarantees durability and protection from external noises, so you can sit back relaxed and enjoy the tranquillity of your home.

### Diagonal design

Diagonal design provides windows with an elegant appearance, to ensure that they fit perfectly with the interior of your home.

### Safety locking piece

Our wood products are equipped with safety locking pieces, enabling windows to reach a similar level of safety as our entrance doors.

### Tilt/open lock rotator

A massive, 30 mm wide fitting which thus also ensures improved stability in the tilted position as well, and the knob lock guarantees safety.

### Drainage

All our wood window ranges are equipped with drainage by default. Water has no chance of being stuck on any wood surface, ensuring that your window will preserve its original condition and durability for a long time.

### Foam TSP seal

We use special foam TSP seal for our windows, which provide high flexibility to retake their shape and provide secure sealing.

---

# MODERN SHADINGS

Dress your windows with Schlotterer!

Intelligent shielding equipment are key components of a modern lifestyle and contemporary neighbourhoods.

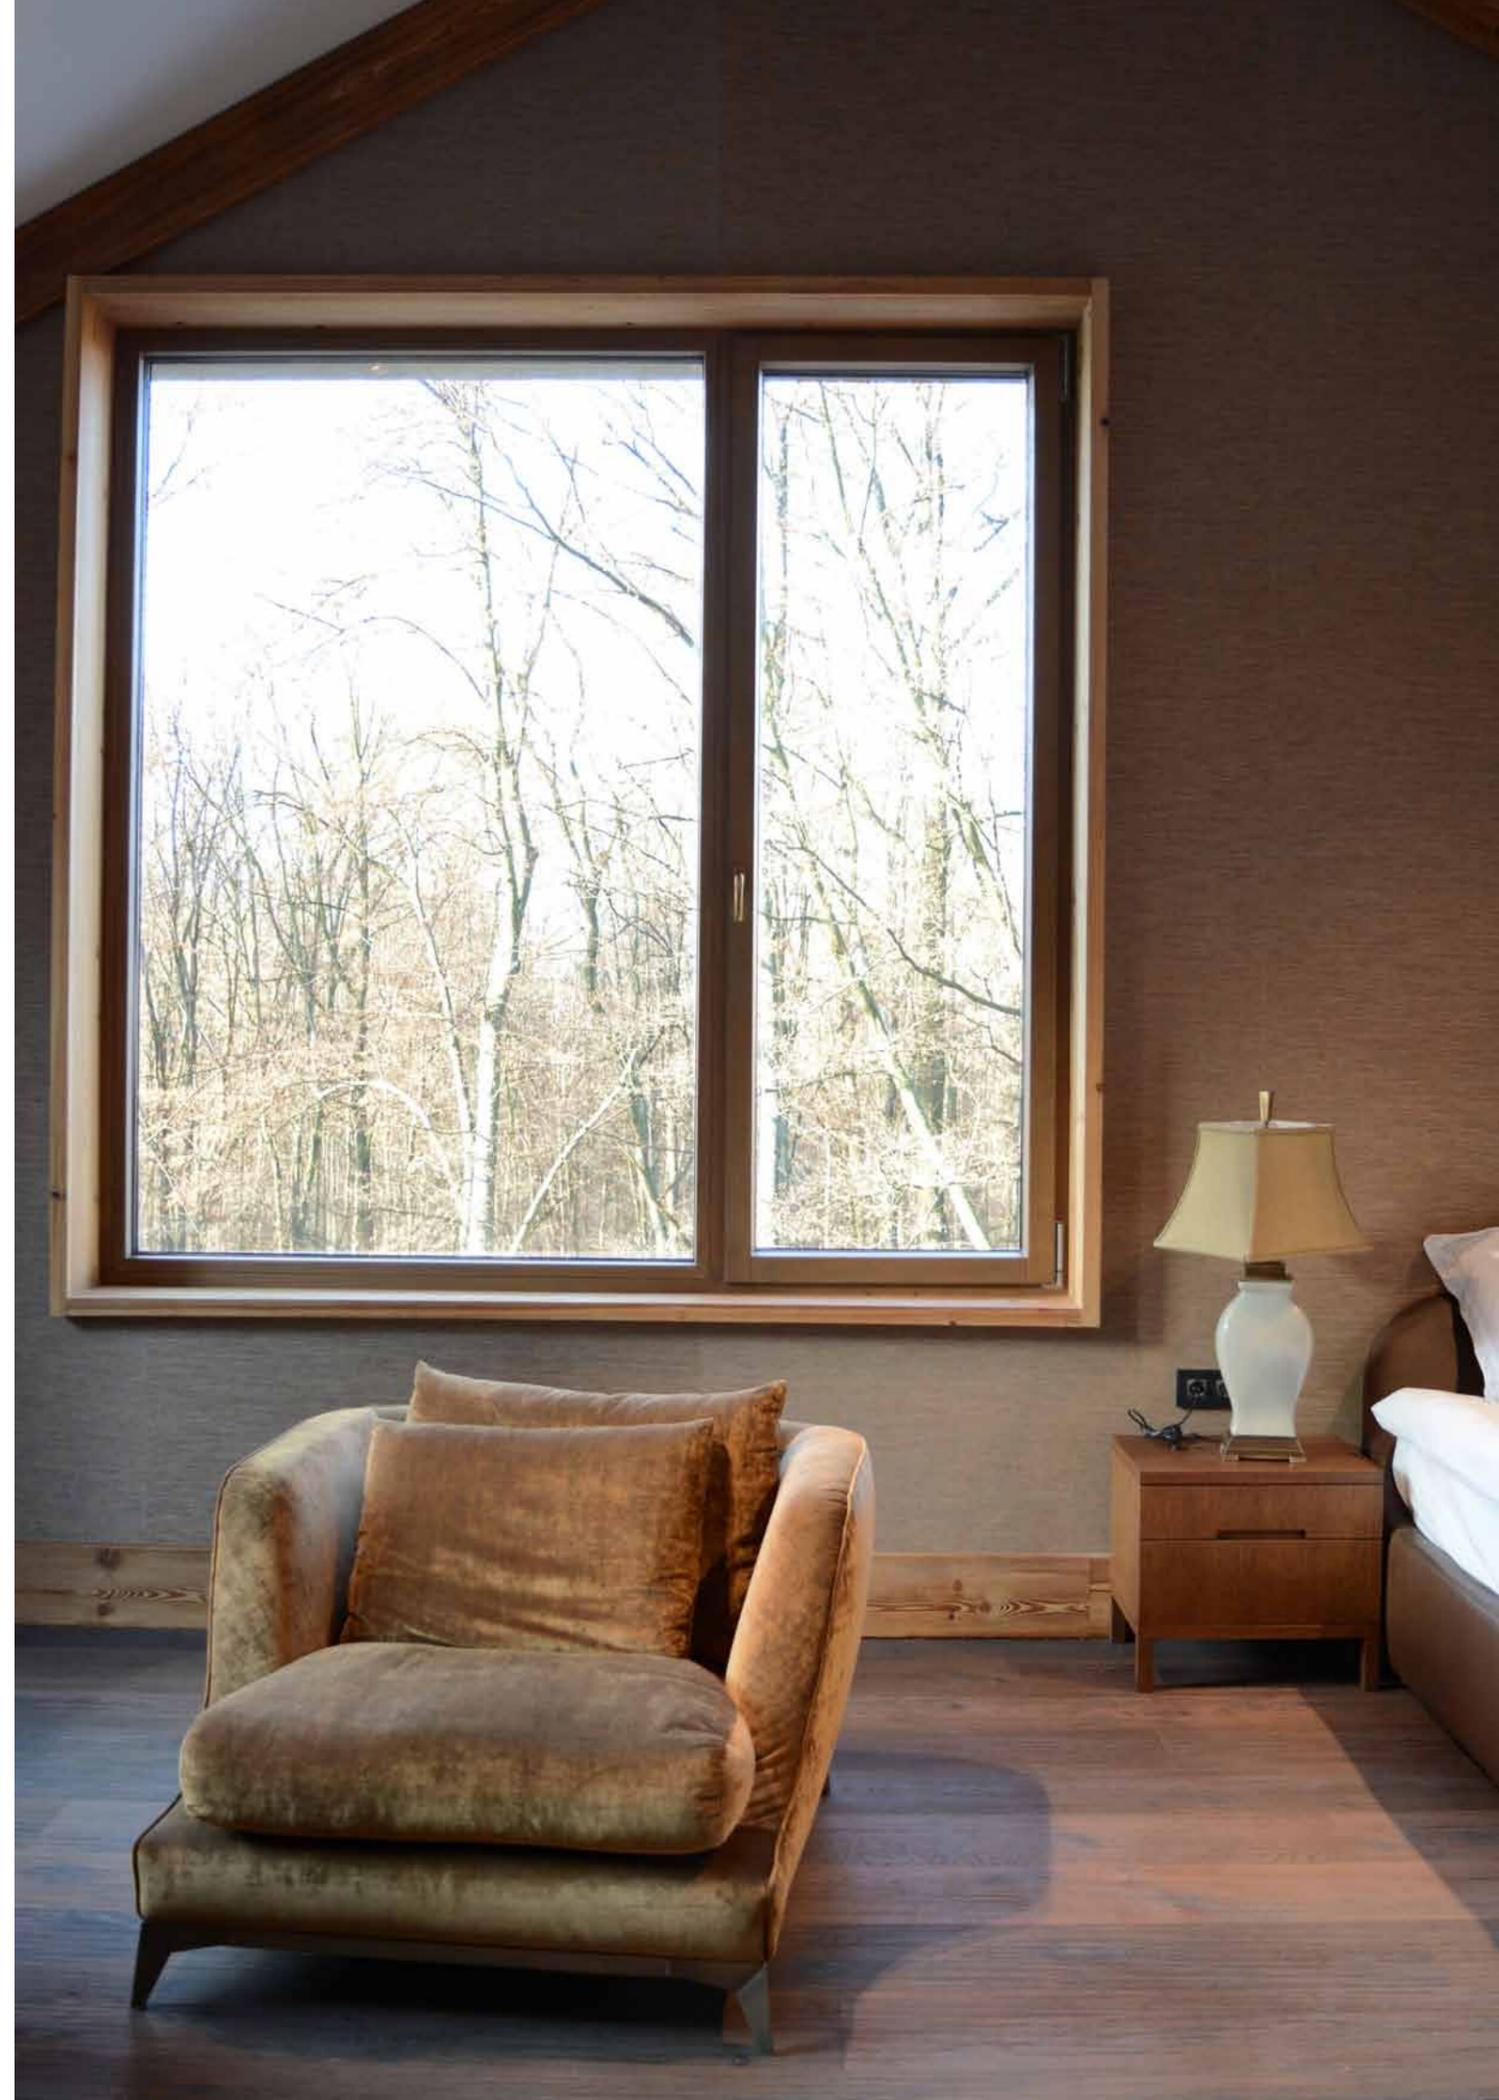

## Window louvres

Louvre systems operate as a passive cooling system in the summer, and they increase the insulation efficiency of windows in the winter. A great advantage provided by louvres is that they direct anti-dazzle sunshine to the interior, thus improving the sense of comfort and our abilities to perform. Choose the perfect louvres for your home, also with hidden boxes or matching-colour hang strips, mantles or aluminium armour on the window.

## Shutters

Doors and windows can easily become the weakest spots of the house, but our intelligent shutters enable you to increase the safety of your home, with aluminium design, and built-in anti-lifting protection. Alternative drive mechanisms for our shutters: electronic actuation with wall-mounted switch or wireless remote controlled design.

**Guaranteed  
unique appearance  
Nothing but perfection,  
inside and outside**

# ANTIQUÉ EXTERIOR, MODERN INTERIOR

**RUSTIC**

## RUSTIC TRADITION AND MODERNITY

We offer our RUSTIC product range for fans of the rustic style, which combines traditional, classic values with modern architectural solutions.

In order to provide a total level of comfort, it represents traditional values from the outside and offers contemporary technical solutions from the inside: heat and soundproof glazing, drainages, EPD seal against unwanted air displacement, 30 mm locking plates for security, the use of high-quality wood material and robotic technology surface treatment for a harmonious appearance.

It is characterised by a graceful, unique look, and the manufacturing of the narrow casing, high glass ratio, fancy mullion or siding can be also provided. Choose our special antique effect products, if you wish to experience the underlying possibilities of traditions and modernity at the same time.

## JOINT WOOD FRAME

The jointed wood frame structure means that the outer and inner casements are connected to a wood frame through fittings. An ideal solution for contemporary houses, because it is guaranteed to meet all of the requirements of monument protection regulations.

### Technical parameters:

U<sub>g</sub> = 1.1 W/m<sup>2</sup>K  
(Heat transfer factor, glass)  
U<sub>w</sub> = 1.6 W/m<sup>2</sup>K  
(Heat transfer factor, structure)  
R<sub>w</sub> = 32 dB (-1;5) (Sound insulation)  
g = 63% (total energy transfer)

## ANTIQUÉ WINDOWS

Our beautiful and uniquely designed windows reminisce the beauty of the olden days from the outside, while they perfectly secure the comfort of the modern lifestyle from the inside.

Available in double or triple glazing in multiple sizes: 68, 80 and 92 mm.

If requested, we can align the windows to the facade and we can manufacture them with hidden or visible fittings, polished brass, matte or brushed accessories on demand.

**Much more than  
merely doors  
and windows...  
Sense the difference!**

# DESIGN & EXPERTISE CUBED

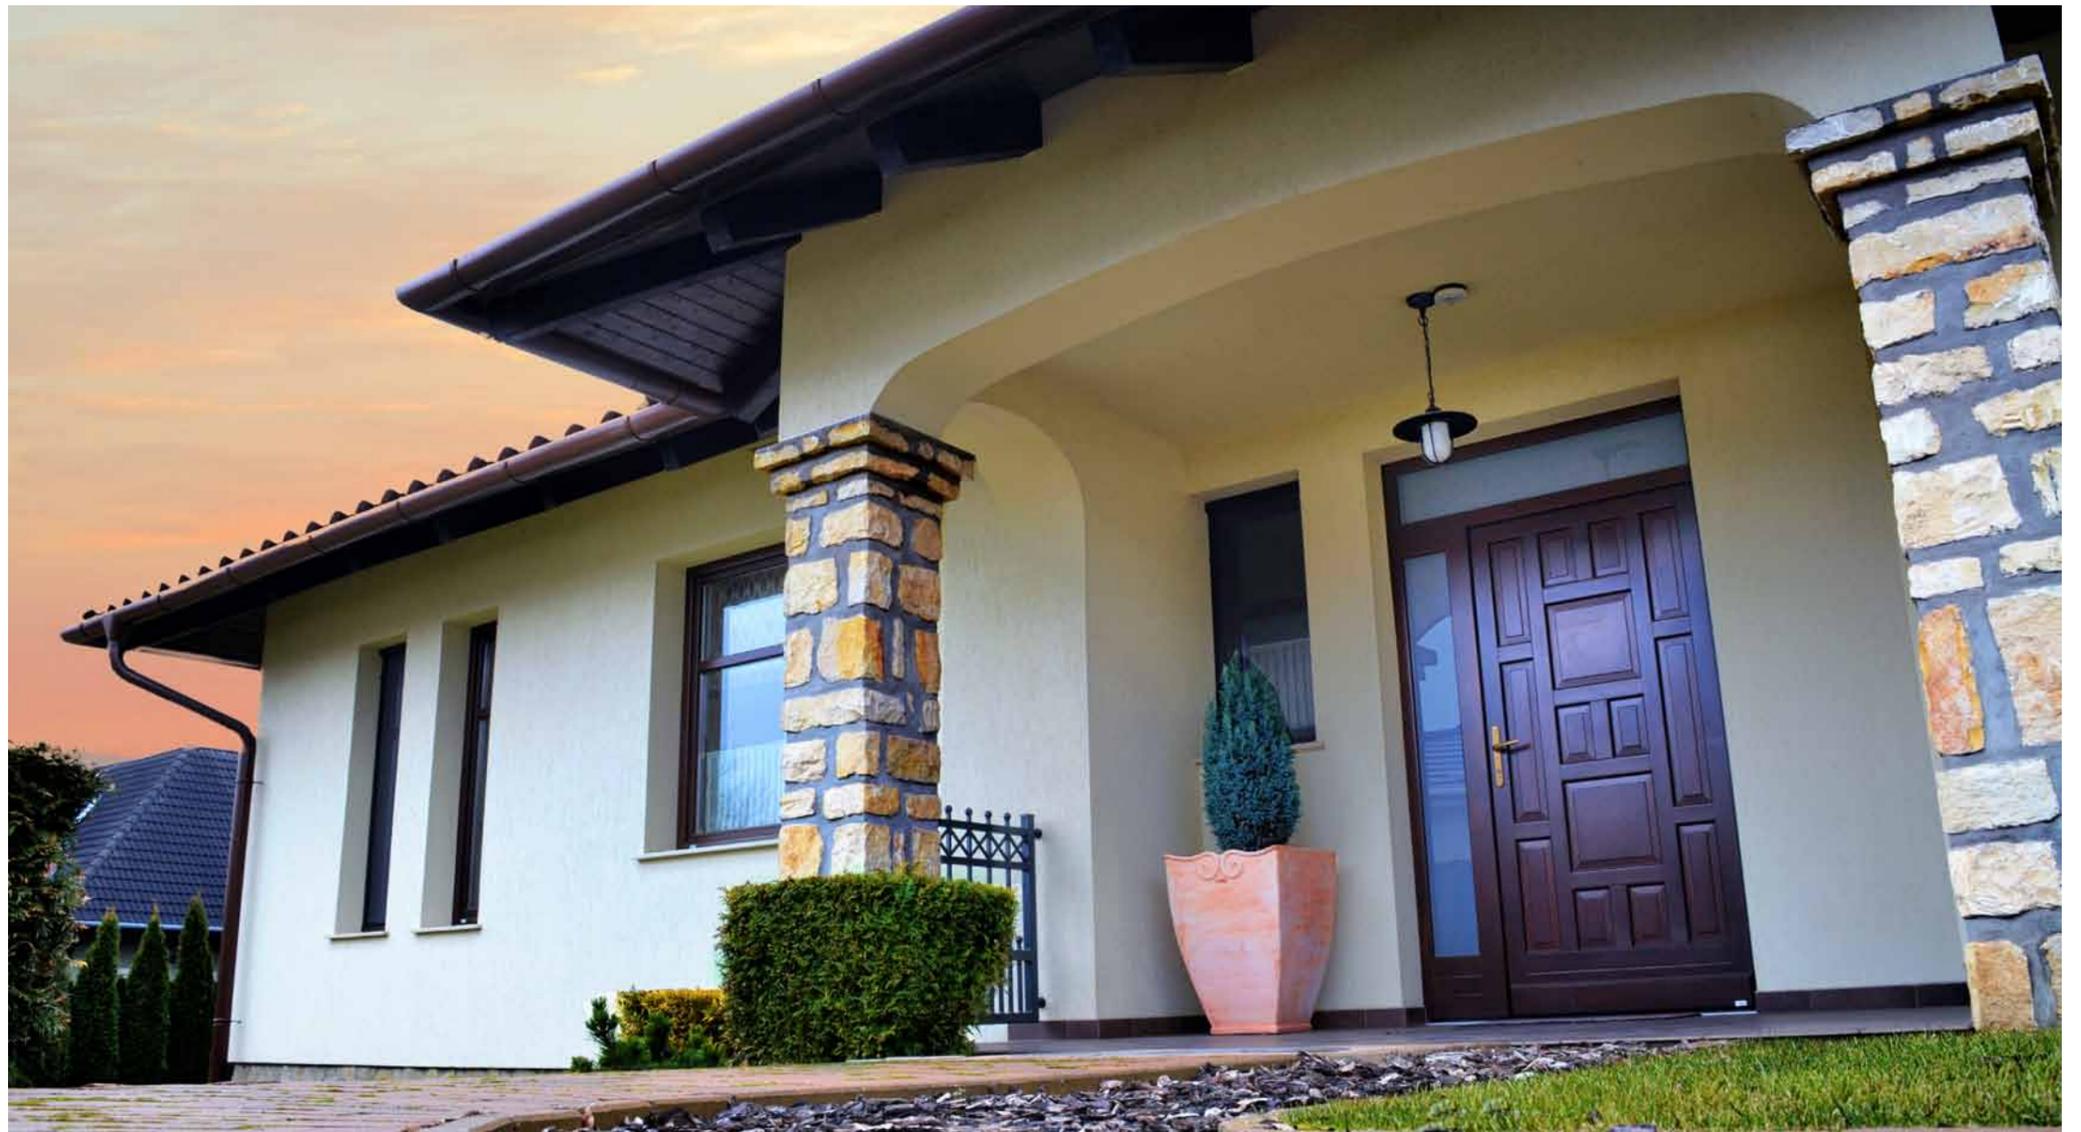

## ENTRANCE DOORS

## ENTRANCE DOORS

Select from our range of wood and wood-aluminium profile entrance doors, each of them guaranteed to provide maximum comfort and safety due to their high-quality wood material and thermal insulated glazing.

“Enjoy the eye-catching shapes and the massive structure, or select our doors created with the harmonious pairing of wood and aluminium.”

## WOOD-ALUMINIUM

Our products, custom made according to your expectations, create a harmony between the business of everyday life and the tranquillity of your home.

The panel doors of the WOOD-ALUMINIUM product range are especially designed to be used as entrance doors, because of their harmonious appearance and special technical characteristics.

The combination of wood and aluminium gives you everything you need in an entrance door. Available in Cross and Cross Flat versions as well!

## WOOD BIG

Eye-catching shapes and a massive structure are the main characteristics of the WOOD BIG product range which are essential for warm and tranquil home. In addition to utilising top-quality materials and providing high-level safety solutions, it also provides outstanding performance with special thermal insulation.

Due to the external and internal vapour barrier, it is extremely durable and does not bend. With the uniquely cut patterns and glass accessories, it creates a beautiful harmony between the exterior design and the inner spaces of your home. If you prefer, choose the WOOD BIG 92 mm version!

---

## UNIQUE STYLE

According to the specific expectations and the environment, different door profiles are available:

Aluminium outside - wood inside or wood on both sides. Aluminium resists the harsh weather changes well, - warmth, cold, UV and snow - while on the inside wood provides harmony and cosiness, and can stay unchanged for the pleasure of many.

---

## PANEL FILLING DESIGN

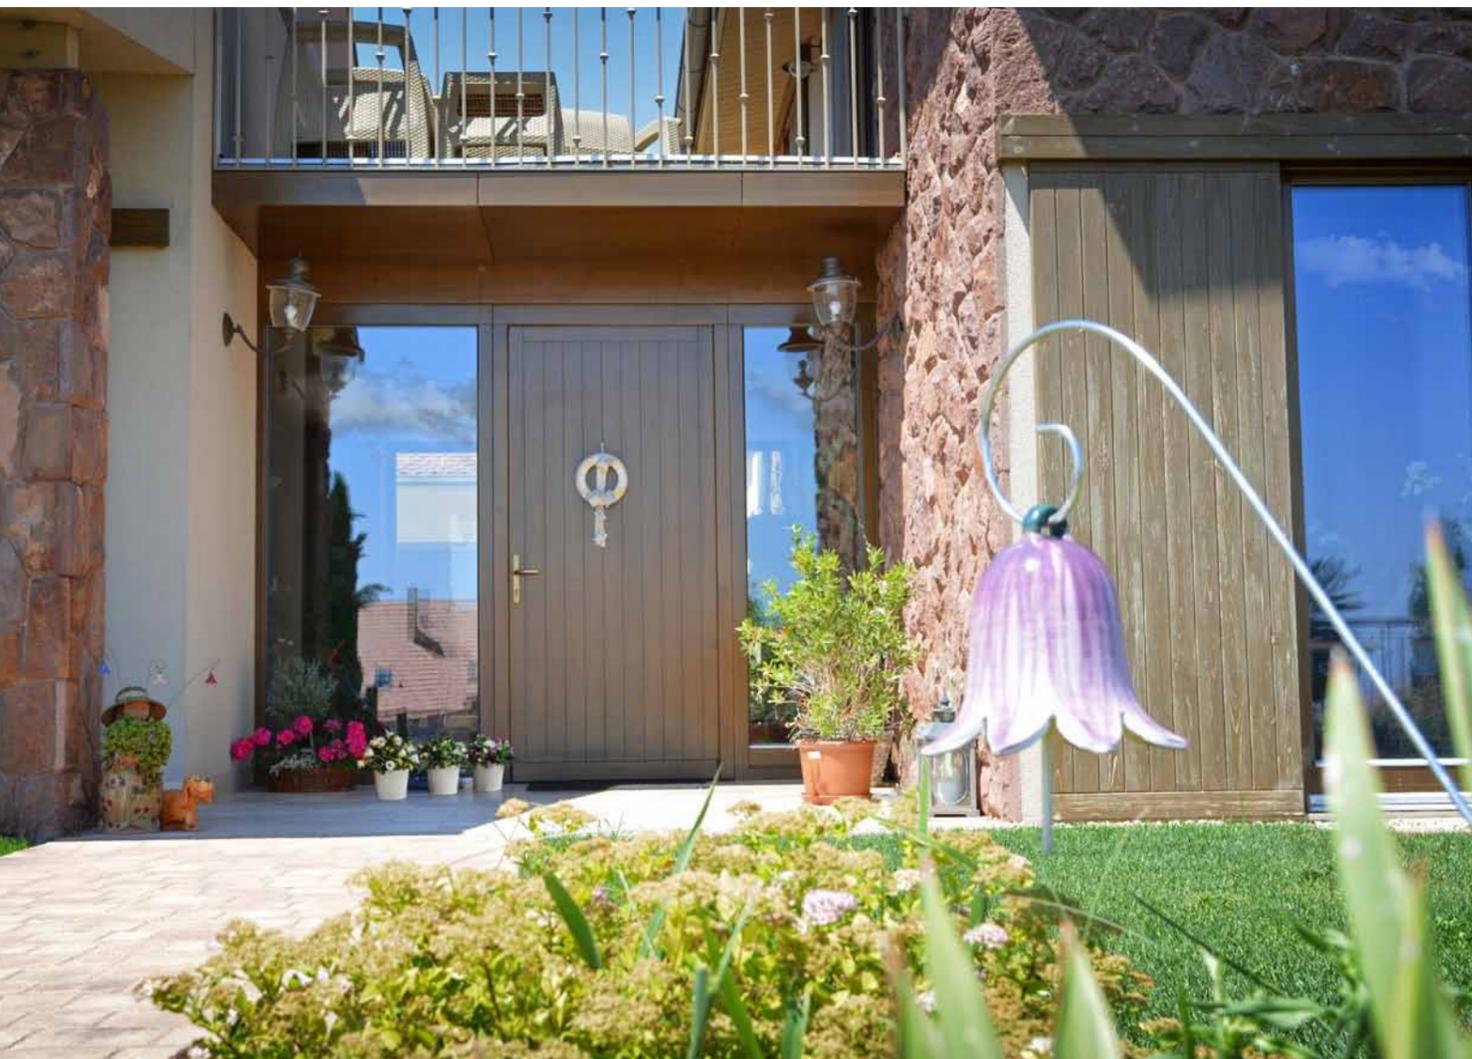

In the case of the panel filling structure, the edges of the components connect to each other. In professional practice we see a large variety of such panel filling structures, and the application thereof enables producing more customised and functionally tailored doors. Divisions, changing the installation of filling and glazing can be used to customise the door sheet, which all guarantee that you will be able to find the most perfect version for your family and home.

---

## SHEET STRUCTURE DESIGN

Our sheet structure doors are made from carefully selected materials, through thorough work processes, to make sure that we manufacture high-quality, durable entrance doors. The sheet structure doors have vapour barrier layers on both sides, and wrap-around metal reinforcement, guaranteeing long-lasting, properly operating entrance doors for our customers. The plywood sheets on the internal and external sides of the doors have a special surface which can be spruce, larch, oak or the special eucalyptus, aligned to the selected wood type. If you opt for doors with a clear design, choose our sheet structure entrance doors which will surely meet your expectations. Milling can be used to manufacture the sheet structure doors, therefore lines and also special patterns can be used to decorate them, and milling for glazing is also possible.

## SAFE HOME

In addition to high-quality structure we also pay special attention to the external design elements: we offer a wide range of options so that everyone can shape one of the most important elements of a home: colours, style and materials. Let your imagination run wild and pair special elements so that your guests will stand in the door amazed!

Looking for something special? Choose from our precious wood covered entrance doors!

### Hinges

To our entrance doors we offer high-quality hinges adjustable in multiple directions (depth and height), with the load-bearing capacity of 160 kg. This 3D adjustable is guaranteed to satisfy your demands.

### Aluminium doorsteps

We also provide aluminium doorsteps to our entrance doors which are not only durable, but also look decorative to guests of the house. The advantages offered include the double-step and the rubber seals in the door which close to the doorstep system in two stages, providing maximum customer satisfaction to you in achieving the best possible sealing effect.

### Automatic locking plates

After shutting the door, the Automatic trap locks are automatically pushed out, and without any separate locking action, the door is bolted at the bottom and top plates. The lock system can be opened at any time, using the door handle from the inside or turning the key from the outside.

## OPTIONAL ACCESSORIES

The entrance door frame can also be ordered with aluminium covering, which provides the door with a "protective shield" and a unique appearance. The two surfaces can be of absolutely different colours, but you may also decide to have two different surfaces. Additionally, custom ideas can be expressed through indoor/outdoor or outdoor-only flush-fitting designs, and special handle varieties. The effect can be further customised with aged surfaces, precious wood covering, as well as brushed and brass accessories.

Whichever solution you choose, the positive impression is guaranteed!

### Glazing and RAL colours

Order our doors in unique design! Choose from visible glaze varieties and the colours of the RAL colour scale to make sure that your entrance door perfectly fits the colours of your home.

### Handle varieties

You can order several handle versions. Select joint or stand-alone escutcheon plate versions, or decorate your door with a modern knob tilted in 45 degrees.

### External and internal flash-fitting

The single-plane closure design gives the products a modern appearance, and they look splendid from both the inside and the outside.

### Aged surface

Select the special aged surface to get a unique rustic look. Enjoy the view of windows with an antique appearance, while from the inside you experience the comfort of modern technology.

### Continuous lock stile

The even more fine-tuned look can be achieved by selecting a continuous lock stile.

### Automatic lock

The double version of the Automatic trap-lock can be ordered optionally, providing an even higher level of safety.

### Black frame

If you prefer, you can request the entrance door with a black frame, ensuring that your door aligns with the style of your home.

### Purenit thermal bridge preventive bottom floor joint

Our special bottom floor joint is recommended for structure touching the ground, in order to avoid thermal bridges. You can avoid mould entirely!

### Hidden hinges

If you wish to avoid breaking the shape of natural surfaces, order the entrance door with hidden hinges which are not visible from the outside.

### Zambezi pack (black)

If you prefer, order the optional Zambezi pack for your door to make sure that your home's entrance is even more unique.

**Exclusive  
solutions –  
open to the world**

**OPEN A NEW PERSPECTIVE  
TO THE WORLD!**

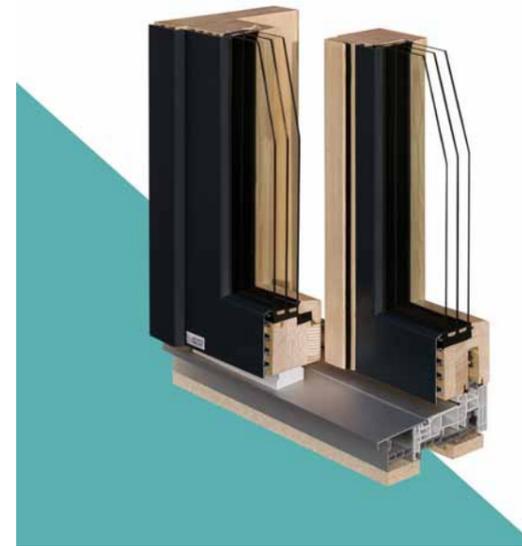

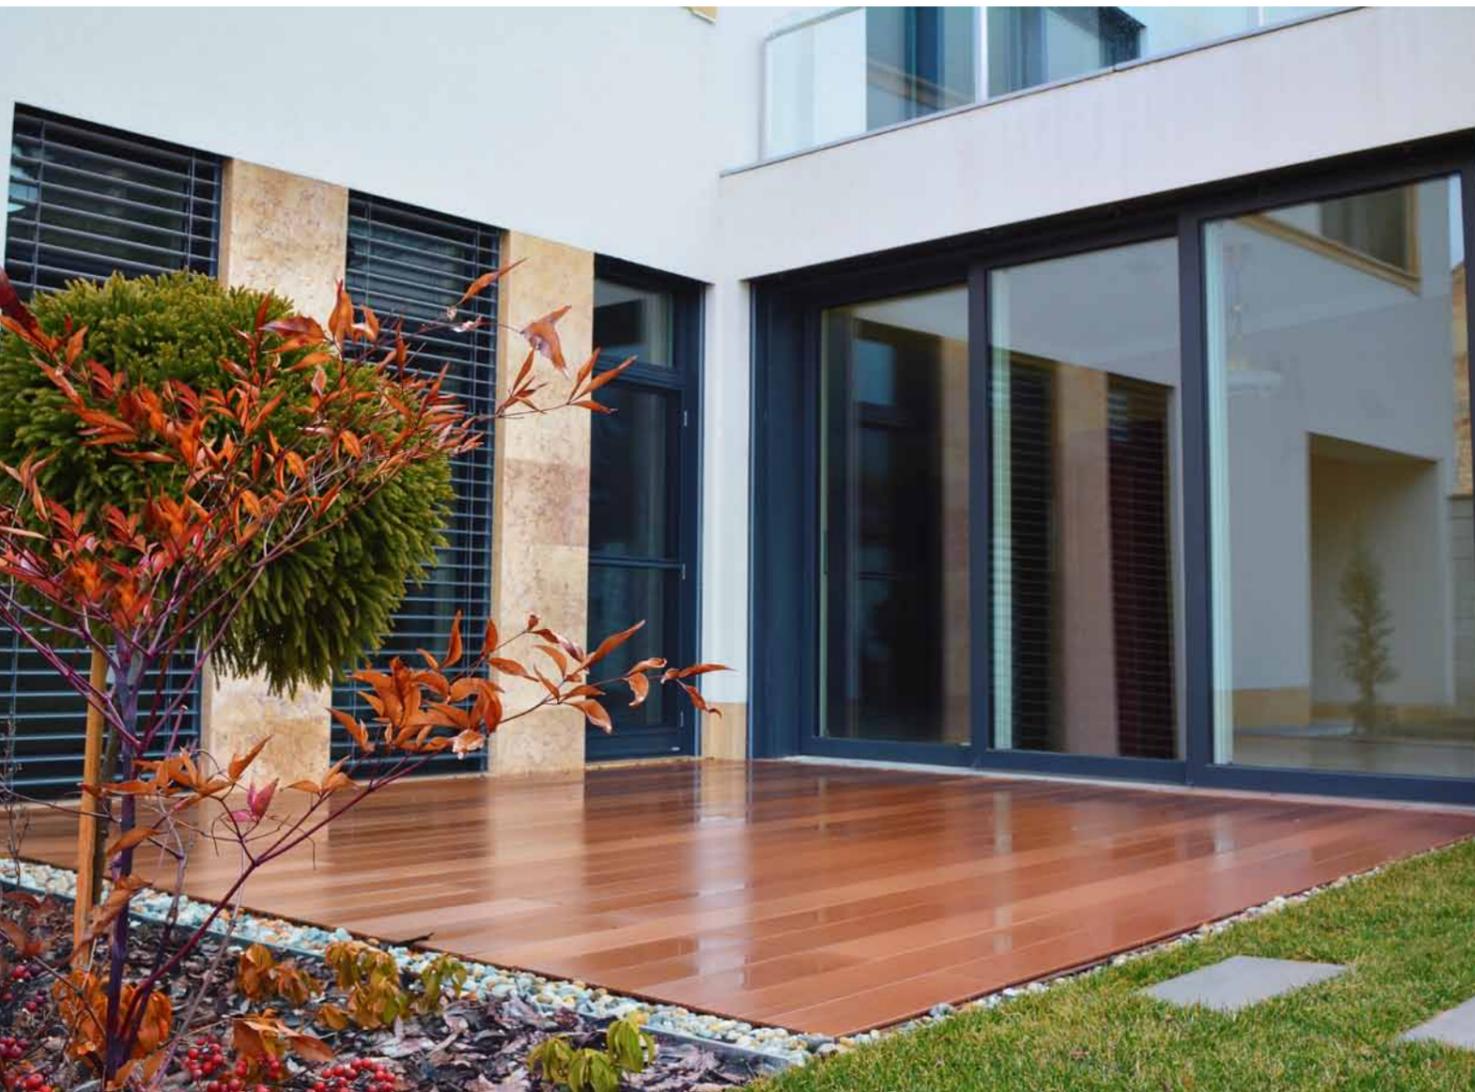

**LIFT AND SLIDE  
DOORS**

## THE JOY OF THE LIGHT

Our lift and slide doors will enable you to open a new perspective to the world. This product range offers unique advantages, enabling you to overcome all barriers. Maximum opening width, multiple seals, and the operation is silent as a whisper. Robotic technology is applied to ensure the flawless and accurate insertion of the slide system.

Big 92 mm wood profiles can also be selected to achieve a natural and harmonic effect, while wood-aluminium profiles can offer a spectacularly large glass surface.

## WOOD-ALUMINIUM

The use of wood-aluminium products is extremely popular among the customers as they perfectly fulfil every demand through their professional solutions.

That is why many customers choose them with a spectacularly large glass surface, even wood-aluminium lift and slide doors, which are available in cross and cross flat versions.

Selecting a profile always depends on our taste and the unique features of our home, but the top quality is guaranteed in each case.

## WOOD BIG

The lift and slide product line offers a special experience and it can be selected with Big 92 mm wood profiles to achieve a natural and harmonious effect.

The great advantages of wood sliding doors both on the inside and the outside is that they provide natural warmth and they are perfectly customisable in their design.

Adjust the appearance of the sliding door to your furniture and interior design from the inside, and choose a style for the outside that is suited to the landscape or the garden.

## ADVANCED TECHNICAL SOLUTIONS

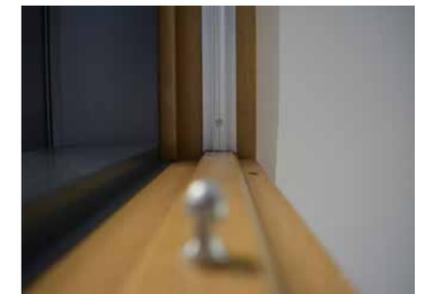

The doors have triple seals for proper closure. Glazing is characterised by a high thermal insulation value; this factor can reach up to 0.5 W/2K. Upon request, glazing can be tempered, safety glass or solar type which significantly reduces the incoming solar heat, thus keeping the interior climate at a pleasant level.

## EASE OF USE

### Gigantic glass panes

Our wood-aluminium and wood life and slide doors are suitable to move up to 400 kg of glass, and therefore they can be perfectly applied in detached houses, lofts, winter gardens and large interior spaces as well.

### Door runner rails

The versatile runner rail is basically the essence of the system, and serves as the basis of our innovative lift and slide door solutions..

### Pull tab / handle

You can optionally select to have our products equipped with pull tabs or handles. Although the handle is more conventional, it is still more practical in many cases, while the tabs offer a discreet solution.

### Built-in wheels

Bearing-equipped carriages installed on the door guarantee the ease of movement, to make sure that you can comfortably open your door at any time.

## OPTIONAL ACCESSORIES

You can select frameless or Cross flat solutions as well to achieve an exclusive appearance. This ensures that you can enjoy a wonderful view throughout the year, where nature almost touches you

Due to its ingenious thermal insulation, it endures the high contrast temperature and does not steam up, so you have nothing else to do, just sit back and enjoy the view.

A true spiritual refreshment for everyone.

### C scheme

Opt for the alignment of lift and slide doors according to the C scheme. In accordance with this design, the two doors slide from the middle to the right and the left, thus the door can be freely accessed through the middle, to ensure that you are even closer to nature.

### Glass-glass connection

Do not let anything block your wonderful view! Our doors and windows fitted with glass-glass turning enable you to enjoy the panorama from your home even in the corners. Make no compromise

# PRECIOUS WOOD COVERED LIFT AND SLIDE DOORS

Sometimes a grim appearance covers a very precious spirit. The external aluminium covering guarantees maximum protection and durability, while the internal precious oak surface gives the spirit to the door. Parallel sliding glass surfaces provide simple and comfortable opening. Doors are aligned according to the "A scheme", thus fixed and mobile doors share an equal proportion.

**Domestic wood materials guarantees top quality, and the unmatched beauty of Hungarian oak provides a stunningly noble appearance.** Enjoy the experience of our top category lift and slide doors, up to the width of 6 metres, which serve the function of an exclusive, charming piece of furniture in your door.

## Flush doorstep

For your maximum comfort, we can chamfer the doorstep of the lift and slide door into the floor, and in this case the frame practically slides on the floor, and you literally do not even have to cross the doorstep for comfort.

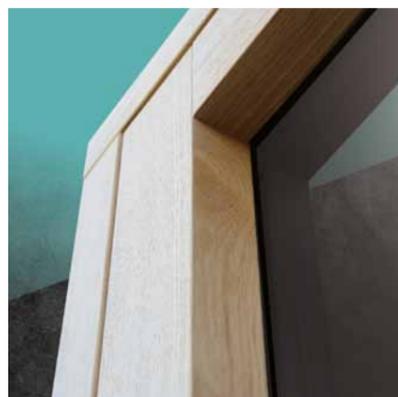

## Thermal bridge preventive thermostep base

The thermal bridge preventive thermostep base also serves your comfort, by enabling you to open doors even more easier. Bearing-equipped carriages of the doors enable the door panels to move on the rails more freely, and be opened with a simple action.

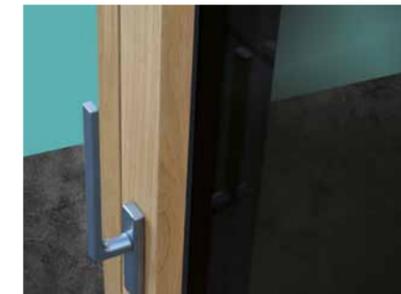

## Runner rail

The top runner rail can be pushed to the end position of the stops, providing maximum space for fresh air to enter and to adjoin different rooms, the garden and the house.

The details provide additional beauty, as each element of the inner components of our doors gives you unmatched finesse. High quality spruce sheets have precious oak covering to provide an even more attractive sensation.

Make no compromise in your home! Enjoy all the fine details of the natural beauty of wood, which looks the same from all sides due to the applied sawn veneer technology.

## Lever arm handle

The long handles guarantee that you will be able to comfortably and easily open the doors, since the handles operate as lever arms and thus significantly reduce the energy required for opening.

## External flush handles

We install flush handles on the external sides of our slide doors to ensure that the doors can be moved smoothly. The handles shape evokes the beauty of seashells to give a pleasant appearance to the external side of the lift and slide door, and at the same time it adjusts well to the rigid aluminium as well.

Our lift and slide doors cannot be unhinged from the rails, thus they operate perfectly at any time. The installation of doors and windows by our professional staff ensures that they can endure a lifetime and can operate properly without any particular maintenance requirements. In the case of lift and slide doors, as well as ordinary doors and windows, we can guarantee that our products will serve you for a very long time.

**Your dream home,  
limitless fantasy,  
innovative solutions**

# PLAY WITH LIGHTS

**SCHLOTTERER**

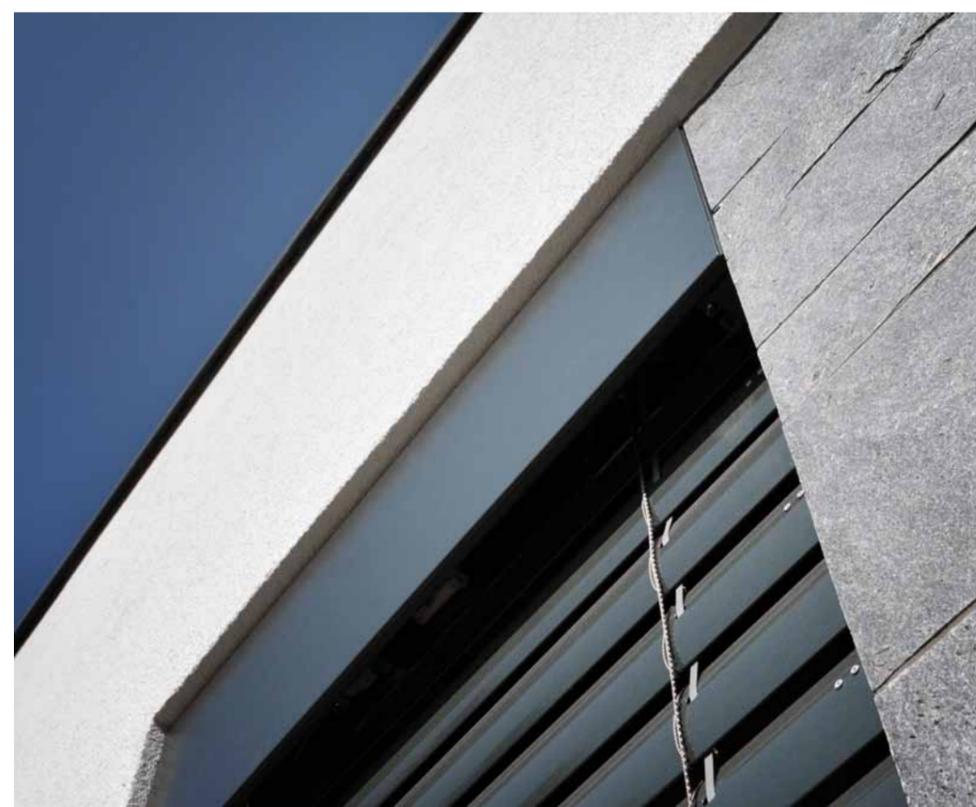

## IDEAL PAIRING

Intelligent shielding systems are essential components of a contemporary home. Shading equipment provides the valuable sunshine required for life and a good atmosphere all year round, and at the same time they increase comfort and provide the necessary shadows as well.

In order to ensure that your relaxation is undisturbed, perfect light control is absolutely necessary, and with their smooth design all our solutions perform this function properly. These mean noise insulation, thermal insulation and stylish decoration at the same time. Shading equipment has very versatile advantages, they can even be utilised for anti-burglary purposes and prevent unauthorised entry.

Choose from our high-quality shades and louvres to prevent overheating in the summer, and also to increase the insulation capacity of your windows and doors in the winter.

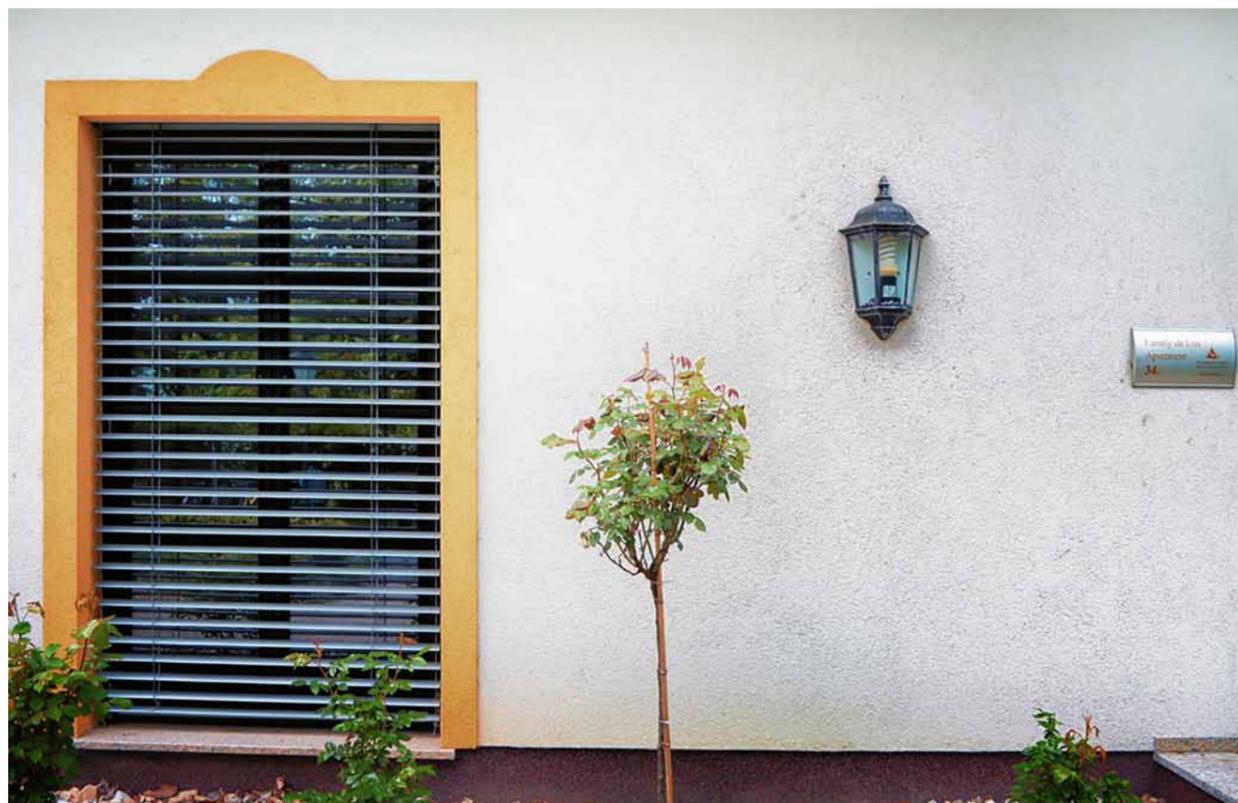

# LOUVRES

We offer a wide range of louvres, tailored to your custom needs. Choose a louvre blade version which fits the intended purpose: based on the width you can choose between 80 mm or 92 mm variants, while based on its form you can choose "C" louvre blade; broken "Z" louvre blade or the asymmetrically broken premium system with the Retrolux premium louvre blades.

Choose a system that can be well combined, where the visible or plasterable edges can be selected individually, and where push, slide or fixed insect screens can be installed.

With the lightweight, wide and aluminium blades, Schlotterer louvres are adjustable to different settings, providing different degrees of shade to enjoy the perfect combination of optimal outlook and inlet of light.

Modern shading equipment also protect your home from unwanted glances. Motor-operated actuation is optionally available for the products, controlled with a wall-mounted switch or remote control.

## SHUTTERS

Our Schlotterer shutters have several favourable features. They optimise the energy balance for the whole year, since in the summer they prevent the overheating of interior spaces and keep it outside in the winter; also, their fine-tuned design provides an exquisite view.

They increase the sense of comfort and optimise the amount of light to be let in, according to the current demand in our home, thus guaranteeing a relaxing sleep and a good atmosphere. They effectively prevent unauthorised entry and protect your home from cold, warmth, winds and other unfavourable weather conditions.

Alternative drive mechanisms for our shutters: electronic actuation with wall-mounted switch or wireless remote controlled design. Shutters are available in different colour, thus enabling you to find the best and most perfect solution for your home.
